

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claims 1-6 (canceled).

1 7. (currently amended) A method for generating a
2 display presentation on a user computer, comprising the
3 steps of:
4 connecting a user computer to a web server over a
5 network;
6 validating said user computer;
7 accepting a web page request from said user
8 computer;
9 determining if said web page request is for
10 generating said display presentation;
11 executing a servlet corresponding to said web page
12 request if it was determined that said web page request
13 was for generating said display presentation;
14 retrieving an HTML template corresponding to said
15 executed servlet;
16 interpreting said HTML template including the steps
17 of:
18 retrieving ~~retrieved~~ data from a database
19 according to said servlet execution, said retrieved
20 data including:
21 survey data and normative data for
22 generating custom display presentations; and
23 descriptive data for labeling said display
24 presentation
25 stripping test data from said HTML template;

26 embedding some portion of said retrieved data
27 in said HTML template, wherein some further portion
28 of some portion of said retrieved data replaces said
29 stripped test data;
30 executing commands referenced in said HTML
31 template, said commands for generating a display web
32 page utilizing said retrieved data;
33 serving said display web page to said user
34 computer, said display web page for generating a
35 display presentation including a graphical diagram,
36 a table, or a multi-medial presentation on said user
37 computer.

Claim 8 (canceled).

1 9. (currently amended) A system for generating a
2 display presentation on a user computer, comprising the
3 steps of:
4 means for connecting a user computer to a web server
5 over a network;
6 means for validating said user computer;
7 means for accepting web page requests from said user
8 computer;
9 means for determining if said web page request is
10 for generating said display presentation;
11 means for executing a servlet corresponding to said
12 web page request if it was determined that said web page
13 request was for generating said display presentation;
14 means for retrieving an HTML template corresponding
15 to said executed servlet;
16 means for interpreting said HTML template including:

17 means for retrieving ~~retrieved~~ data from a
18 database according to said servlet execution, said
19 retrieved data including:
20 survey data and normative data for
21 generating custom display presentations; and
22 descriptive data for labeling said display
23 presentation
24 means for stripping test data from said HTML
25 template;
26 means for embedding some portion of said
27 retrieved data in said HTML template, wherein some
28 further portion of some portion of said retrieved
29 data replaces said stripped test data;
30 means for executing commands referenced in said
31 HTML template, said commands for generating a
32 display web page utilizing said retrieved data;
33 means for serving said display web page to said
34 user computer, said display web page for generating
35 a display presentation including a graphical
36 diagram, a table, or a multi-medial presentation on
37 said user computer.

Claims 10-18 (canceled).

1 19. (currently amended) A method for generating a
2 display presentation on a user computer, comprising the
3 steps of:
4 connecting a user computer to a web server over a
5 network;
6 accepting a web page request from the user computer;
7 determining if said web page request is for
8 generating said display presentation;

9 executing a servlet corresponding to said web page
10 request if it was determined that said web page request
11 was for generating said display presentation;
12 retrieving an HTML template corresponding to said
13 executed servlet;
14 interpreting said HTML template including the steps
15 of:
16 retrieving retrieved data from a database
17 according to said servlet execution, said retrieved
18 data having:
19 survey data and normative data for
20 generating custom display presentations, and
21 descriptive data for labeling said display
22 presentation;
23 embedding some portion of said retrieved data
24 in said HTML template; and
25 executing at least one command referenced in
26 said HTML template, said at least one command for
27 generating a display web page utilizing said
28 retrieved data;
29 serving said display web page to the user computer,
30 said display web page for displaying a display
31 presentation of a previously conducted survey including a
32 graphical diagram, a table, or a multi-medial
33 presentation on the user computer;
34 serving at least one applet along with said web page
35 to the user computer; and
36 ~~The method of claim 18, further comprising the step~~
37 ~~of stripping test data from said HTML template, wherein~~
38 ~~some further portion of some portion of said retrieved~~
39 ~~data replaces said stripped test data, wherein~~

40 said displaying said display presentation on the
41 user computer includes the step of executing said applet
42 on the user computer, and wherein
43 said at least one applet is a member of the group
44 consisting of:
45 graphing applets for generating graphical
46 diagrams;
47 table producing applets for generating tables;
48 and
49 multimedia applets for generating multimedia
50 presentations; and further wherein said template
51 comprises:
52 title information;
53 descriptive data for labeling said display
54 presentation; and
55 JavaScript code to communicate size and location
56 information to said at least one applet for directing the
57 formatting of said display presentation.

Claims 20-31 (canceled).
